Joining the OAC team in 2007, Christian specializes in forensic investigations and repair design for buildings subjected to water intrusion. He is a RCI registered roof consultant and OAC's in-house roofing expert. Christian frequently performs failure investigations, condition assessments, and repair / replacement designs for roof and waterproofing systems. Christian's practicality and depth of knowledge make him an accomplished team member.

Formerly a construction superintendent and carpenter, Christian brings hands-on knowledge of construction methodologies to the team.

Practice Areas

- Roofing and waterproofing
- Construction observations
- Forensic and failure investigation
- Condition and risk assessment
- Existing enclosure repair

Representative Projects

Forensic and failure investigation

- Rivergate Office and Warehouse Complex, Portland, WA
- Carpenters Tower, Seattle, WA
